30 Memorial Day  Kids Inc Closed	31 			

Play is an essential part of early learning.

It is the lifeblood of the learning process.

As children play they are developing the cognitive, socio-emotional and physical skills they will need to take them into a successful adulthood.

They are developing their curiosity, problem-solving, intentionality, flexibility, and verbal and non verbal skills.

Socio-emotionally they are developing their emotional intelligence- learning confidence, cooperation, negotiation, sharing, empathy, and how to communicate appropriately.

Physically their fine motor and gross motor skills are being practiced and developed.

It's not "Just Play" they are skills for life!
