29 	30 	31 		
<b>Transportation</b>				

## Parent Info:

Everyone agrees books are a necessary part of a child's education. Even young infants benefit from having simple books read to them. Looking at books and hearing them read aloud stimulated an infant's brain development.

Read & tell stories to your child every day. The words and pictures are important, but most of all, spending time with you as you read aloud and tell stories lets your child know how much you value these activities. Reading is a wonderful way to be together, whether during your child's bedtime routine or a relaxed daytime opportunity.

Happy Reading!
